Organizer Operation Manual

I. Project Usage Instructions

1.1 Project Overview

This project serves as a supporting practical tool for the Youth Media Literacy Growth Assistant. Centered on immersive training based on real-life cases, it guides young people through a complete closed-loop of information processing: situational judgment, multi-dimensional verification, risk assessment, rational communication, and post-event review and reflection.

The website features five categories of typical media risk cases covering five prevalent scenarios: AI deepfakes, misleading visual content, sensationalized false news headlines, misinformation about health and science, and social media manipulation. Equipped with a standardized card-based training workflow, the tool is applicable to a wide range of settings including campus media literacy courses, Communist Youth League student activities, new media club training, and youth education programs in communities.

1.2 Core Training Logic

The project follows the cognitive pattern of "judge first, verify second, decide third, review finally," corresponding to 7 training cards on the website, forming a complete capability training chain:

- **Situation Case Card:** Presents the complete information scenario, triggers initial judgment, and establishes initial cognition
- **Source Verification Card:** Checks the information publisher, account qualification, and platform attributes to judge source credibility
- **Context Verification Card:** Restores the complete background, timeline, and full picture of the event to identify taken-out-of-context content
- **Evidence Verification Card:** Verifies the authenticity and authority of facts, data, and arguments in the information
- **Risk Assessment Card:** Comprehensively judges the misleading risk, dissemination harm, and impact scope of the information
- **Dissemination Action Card:** Makes personal dissemination decisions based on assessment results (forward / verify / debunk / ignore)

- **Case Answer & Review Page:** Publishes official verification conclusions, breaks down misconceptions, and summarizes reusable methods

1.3 Website Operation Guide

1. Open the URL: <https://tttscy.github.io/>
2. Enter the homepage, which displays 5 category entry points for cases
3. Select the corresponding case and click to enter. The system defaults to the sequence: Situation Case Card → Source Verification Card → Context Verification Card → Evidence Verification Card → Risk Assessment Card → Dissemination Action Card → Case Answer & Review Page
4. During the activity, the organizer can control the pace of page progression while participants complete thinking and recording simultaneously; participants can also complete the steps independently
5. All cases are for teaching purposes. The review page includes complete verification ideas and method summaries, which can be used as knowledge expansion materials

1.4 Applicable Scenarios and Target Audience

Target audience: Adolescents and youth aged 14-35

Recommended scenarios: Practical courses for journalism and communication in universities, themed Youth League Day activities, pre-job training for new media practitioners, media literacy courses for middle school students, community youth public welfare classrooms

Organization format: Recommended to be conducted in discussion groups of 4-6 people; also supports individual self-training

II. Activity Schedule

2.1 Standard 90-Minute Session

Session	Corresponding Website Card	Duration	Core Task
Opening & Rules Introduction	Homepage Case Entry	10 minutes	Introduce project objectives, activity process, and grouping rules
Case Situation Introduction + Initial Judgment	Situation Case Card	10 minutes	Read the case, independently complete initial judgment, share views in groups
First Round Verification: Source Check	Source Verification Card	10 minutes	Complete source verification following card guidance, record verification process
Second Round Verification: Context Restoration	Context Verification Card	10 minutes	Restore complete event background, identify information cropping misguidance
Third Round Verification: Evidence Validation	Evidence Verification Card	10 minutes	Check factual arguments and data sources, verify core information
Risk Assessment & Dissemination Decision	Risk Assessment Card + Dissemination Action Card	15 minutes	Group comprehensive risk assessment, form unified dissemination decision
Answer Announcement & Collective Review	Case Answer & Review Page	20 minutes	Compare with official conclusions, break down misconceptions, summarize methods

Summary & Extension	—	5 minutes	Sort out reusable verification methods, assign post-class expansion
---------------------	---	-----------	---

2.2 Condensed 45-Minute Session

Session	Corresponding Website Card	Duration	Core Task
Opening & Case Introduction	Homepage + Situation Case Card	5 minutes	Quickly introduce rules, present the case
Concentrated Verification Demo	Source / Context / Evidence Verification Cards	15 minutes	Host leads three rounds of verification simultaneously, demonstrates while explaining
Decision & Discussion	Risk Assessment + Dissemination Action Card	10 minutes	Quick on-site voting, share decision reasons
Review & Method Summary	Answer & Review Page	15 minutes	Announce conclusions, extract 3 core verification techniques

III. Host Facilitation Scripts

3.1 Opening Session Script

Hello everyone, welcome to this youth media literacy training activity. We are exposed to massive online information every day. AI-generated content, repurposed old images, clickbait headlines, and other phenomena emerge endlessly. Without caution, we might be misled or even become spreaders of false information.

Today, through a real case, we will go through the complete process of "seeing information → verifying information → deciding whether to forward it" to train your information judgment skills. No professional knowledge preparation is needed for the entire activity. Just follow the case cards step by step and honestly record your judgments.

Next, we will divide into groups of 4-6 people. Each case has 7 sessions, and we will proceed in order. You can watch the screen while filling out the action record form in your hands, and feel free to discuss within your group at any time.

3.2 Case Introduction & Initial Judgment Session Script

Now we enter the first session: Case Situation. Please carefully read the case content on the screen — this is the kind of information we would encounter while scrolling through our phones.

Please don't rush to look up information. Based on your first impression, answer the questions on the record form: When you first saw this information, did you believe it? Was your first reaction to forward it, verify it, or just scroll past? You have 5 minutes for independent thinking, after which each group will send a representative to share your initial judgments and reasons.

Alright, I've heard different viewpoints — some find it very credible, others have doubts. Next, we will verify the authenticity of this information step by step through three rounds of verification.

3.3 Source Verification Session Script

Now we move to the first verification card: Source Verification. The first step in judging whether information is credible is to see who posted it, where it was posted, and whether it has formal source identification.

Please follow the prompts on the card to check the qualifications of this publishing account, whether it has official verification, whether past published content is reliable, and also check whether the information cites its source. Record your verification process and discovered doubts in the form. You can exchange the clues you've found within your group.

Many groups have identified issues with the source. This is our first step

in verification and also the easiest method to master. Next, let's continue to see what the complete background of this information is.

3.4 Context Verification Session Script

Next comes the second verification card: Context Verification. Much disinformation is not entirely fabricated; instead, it misleads audiences through cropped footage, out-of-context quotes, and repurposing old images for new events.

Follow the guidance on this card to reconstruct the complete timeline, full scenario, and root causes of the incident. Check whether the information omits critical background details or reverses the chronological order of events. Compare the full context you reconstruct against the claims in the original post, and document all discrepancies.

We will find that incomplete disclosure of truthful information often causes misleading impressions — this is the cognitive bias resulting from a lack of context. Now let's move on to the core segment: Evidence Verification.

3.5 Evidence Verification Session Script

Now we enter the third verification card: Evidence Verification. Whether the core argument of a piece of information holds up depends on whether it has solid evidence support, such as authoritative data, official announcements, or professional research conclusions.

Please verify whether the facts, data, and cases mentioned in the information are true, where they come from, whether they are endorsed by authoritative institutions, and whether they have been tampered with or exaggerated. Record your verification results, distinguishing what is verifiable from what is unfounded.

With this, we have completed three rounds of verification. I believe everyone now has a clearer judgment on the authenticity of this information. Next, let's assess its risks and make the final dissemination decision.

3.6 Risk Assessment & Dissemination Decision Session Script

Now please open the Risk Assessment Card and Dissemination Action

Card. First, synthesize the results of the previous three rounds of verification to assess the risk level of this information: Is it completely true and credible, partially misleading, or basically false? What impact would it have if widely disseminated?

Based on your assessment, make your dissemination decision: Will you forward it confidently, forward it with supplementary explanations, actively verify it, remind others to be cautious, or simply ignore it? You can also write down the specific actions you would take. You have 10 minutes for group discussion, and finally form your group's unified decision and reasoning.

3.7 Review Summary Session Script

Alright, each group has shared their decisions and reasons. Now let's announce the official verification conclusion and complete review. Please compare the answer and review page on the screen to see which parts align with your previous judgments and where there were deviations.

We can extract several universal verification methods: First, check the source; second, check the context; third, check the evidence. In the future, when you encounter uncertain information, you can use this three-step method to verify first.

Today's training is not about "getting the right answer" — it's about developing the habit of "verify before disseminating." I hope that in the future, when you encounter suspicious information online, you can pause before forwarding, take an extra step to verify, and be responsible information spreaders.

IV. Case Material Distribution & Progression Order

4.1 Online Website Progression Order

The entire activity strictly follows the website card order and cannot skip steps, ensuring participants form independent judgments before gradual verification:

Step 1: The homepage displays 5 types of cases. The organizer selects the case for this session and clicks to enter.

Step 2: Stay on the "Situation Case Card" until participants complete their initial judgment, then turn to the next page.

Step 3: Progress through "Source Verification Card → Context Verification Card → Evidence Verification Card" in sequence, allowing sufficient thinking and recording time for each round.

Step 4: Simultaneously display the "Risk Assessment Card" and "Dissemination Action Card" to guide comprehensive decision-making.

Step 5: Finally open the "Case Answer & Review Page" to uniformly announce conclusions and conduct review.

4.2 Offline Supporting Material Distribution Order

If conducting the activity with paper materials, distribute them in stages according to the following order to avoid spoiling the answers in advance:

- Activity opening: Distribute the "Participant Action Record Form"
- Case introduction session: Only distribute the paper version of the "Situation Case Card" for the corresponding case
- Verification sessions: Distribute the corresponding verification card when entering each verification session; do not distribute subsequent cards in advance
- Decision session: Distribute the "Risk Assessment Card" and "Dissemination Action Card"
- Review session: Distribute the paper version of the "Case Answer & Review Page," or display it uniformly on a large screen

V. Activity Precautions

5.1 Pre-Activity Preparation

- **Equipment testing:** Test projection equipment and network in advance to ensure the website opens normally and pages load smoothly
- **Material preparation:** Print sufficient "Participant Action Record Forms" in advance; if using paper cards, package them by session
- **Group arrangement:** Divide groups in advance, ideally 4-6 people per group; assign 1 group leader per group to organize discussions
- **Content preview:** The host should thoroughly browse all cards and

review content for the corresponding case in advance and be familiar with core knowledge points

5.2 On-Site Execution Key Points

- **Pace control:** Strictly follow the time schedule to avoid individual sessions running overtime; patrol appropriately during group discussions to guide focus on the topic
- **Neutral facilitation:** Do not reveal answers in advance during discussions, do not negate participants' initial judgments, and encourage diverse expression of views
- **Misconception clarification:** When encountering common cognitive biases, do not correct directly — guide participants to discover doubts themselves through questioning
- **Atmosphere building:** Emphasize that "there are no right or wrong answers in training," reduce participant pressure, and encourage active sharing of thought processes

5.3 Review Facilitation Principles

- **Prioritize methods over correctness:** The core of review is to extract reusable verification methods, not to judge whether participants' judgments are correct
- **Prioritize thinking over conclusions:** guide participants to elaborate their thought processes, compare them with official verification methodologies, and pinpoint cognitive blind spots.
- **Prioritize transfer over memorization:** Encourage participants to share similar information they have encountered based on their own online experiences, strengthening method transfer

5.4 Compliance & Safety Tips

- All cases are only for media literacy teaching. Do not take secondary screenshots of false information in the cases and disseminate them to public platforms
- Avoid repeating the core content of false information during review explanations; focus on verification methods and risk points

- For cases involving health or social events, do not extend discussion of the events themselves — focus on the media literacy methodology level
- Do not guide participants to search for or visit the original publishing pages of false information during the activity

Participant Action Record Forms

Case 1: AI Deepfake Video Verification Record

Basic Information

Participant Name: _____; Activity Date: _____

I. Initial Judgment

1. After watching the video scenario of "Zelenskyy calls on soldiers to lay down arms" in the context of the Ukraine conflict, would you forward this message?

☐ Yes ; ☐ No ; ☐ Uncertain

2. Your initial reasons for this judgment:

II. Step-by-Step Verification Record

2.1 Source Verification

1. You judge the original source type of this content is:

☐ Official ; ☐ Anonymous ; ☐ Media repost

2. Does this content have a traceable complete dissemination chain?

☐ Yes ; ☐ No ; ☐ Cannot determine

3. Key findings of this verification and changes in your judgment:

2.2 Context Verification

1. Does this content have issues of missing context / fragmentation?

☐ Yes ; ☐ No ; ☐ Cannot determine

2. Would the missing context information change your understanding of the information's meaning?

☐ Yes ; ☐ No ; ☐ Cannot determine

3. Key findings of this verification and changes in your judgment:

2.3 Evidence Verification

1. Is there consistent evidence supporting / refuting this content?
☐ Supports ; ☐ Refutes ; ☐ No consistent conclusion
2. Core evidence types supporting the conclusion (multiple selections allowed):
☐ Independent fact-checking institution conclusions
☐ Official channel statements
☐ Technical tampering evidence
☐ Other: _____
3. Key findings of this verification and changes in your judgment:

2.4 Risk Assessment

1. You judge the risk level of this content being disseminated unverified in a conflict scenario as:
☐ Low ; ☐ Medium ; ☐ High
2. Main risks that may arise from widespread dissemination of this content (multiple selections allowed):
☐ Misleading public perception of the situation
☐ Exacerbating battlefield uncertainty
☐ Triggering public panic
☐ Other: _____
3. Key findings of this assessment and changes in your judgment:

III. Final Dissemination Decision

1. After completing all verification, what actions will you take? (Multiple selections allowed)
☐ Forward directly
☐ Forward with verification notes
☐ Do not forward

- ☐ Decide after further verification
- ☐ Report to the platform

2. Core reasons for your decision:

IV. Review & Reflection

1. Comparing your initial judgment with your final decision, has there been a change? What caused the change?
2. Which verification stage exerted the greatest impact on your final decision, and why?
3. After completing this case, what information verification capabilities have you mastered? (Multiple selections allowed)
 - ☐ Publisher credential verification
 - ☐ Applicable boundary analysis
 - ☐ Scientific evidence verification
 - ☐ Health risk assessment
 - ☐ Decision-making under uncertainty
4. Other reflections and takeaways:

Case 2: Health & Science Misinformation

Verification Record

Basic Information

Participant Name: _____ ; Activity Date: _____

I. Initial Judgment

1. After reading the health viewpoint scenario that "mung bean soup and raw eggplant can cure hypertension, diabetes, and cancer," would you forward this message?

☐ Yes ; ☐ No ; ☐ Uncertain

2. Your initial reasons for this judgment:

II. Step-by-Step Verification Record

2.1 Source Verification

1. Do you find the publisher's qualifications for this health viewpoint credible?

☐ Credible ; ☐ Not credible ; ☐ Cannot determine

2. Is there traceable official proof of the publisher's medical background and official titles?

☐ Yes ; ☐ No ; ☐ Cannot determine

3. Key findings of this verification and changes in your judgment:

2.2 Context Verification

1. Does this dietary therapy viewpoint have issues of generalized application scope and stripped medical premises?

☐ Yes ; ☐ No ; ☐ Cannot determine

2. After stripping the applicable boundaries, would it change your judgment of the dietary therapy's effectiveness and risks?

☐ Yes ; ☐ No ; ☐ Cannot determine

3. Key findings of this verification and changes in your judgment:

2.3 Evidence Verification

1. Is there consistent evidence supporting / refuting the claim that dietary therapy cures diseases?
☐ Supports ; ☐ Refutes ; ☐ No consistent conclusion
2. Core evidence types supporting the conclusion (multiple selections allowed):
☐ Authoritative medical institution conclusions
☐ Health authority announcements
☐ Clinical empirical data
☐ Other: _____
3. Key findings of this verification and changes in your judgment:

2.4 Risk Assessment

1. You judge the risk level of this health claim being disseminated unverified as: ☐ Low ; ☐ Medium ; ☐ High
2. Main risks that may arise from widespread dissemination of this content (multiple selections allowed):
☐ Misleading patients to delay formal treatment
☐ Disrupting agricultural product market order
☐ Undermining public trust in evidence-based medicine
☐ Other: _____
3. Key findings of this assessment and changes in your judgment:

III. Final Dissemination Decision

1. After completing all verification, what actions will you take? (Multiple selections allowed)
☐ Forward directly ; ☐ Forward with verification notes
☐ Do not forward ; ☐ Decide after further verification

☐ Report to the platform

2. Core reasons for your decision:

IV. Review & Reflection

1. Comparing your initial judgment with your final decision, has there been a change? What caused the change?

2. Which verification stage exerted the greatest impact on your final decision, and why?

3. After completing this case, what information verification capabilities have you mastered? (Multiple selections allowed)

☐ Publisher credential verification

☐ Applicable boundary analysis

☐ Scientific evidence verification

☐ Health risk assessment

☐ Decision-making under uncertainty

4. Other reflections and takeaways:

Case 3: Social Media Manipulation

Verification Record

Basic Information

Participant Name: _____ ; Activity Date: _____

I. Initial Judgment

1. After reading the content scenario of influencer Logan Paul promoting "Elongate meme coin," would you forward this message?

☐ Yes ; ☐ No ; ☐ Uncertain

2. Your initial reasons for this judgment:

II. Step-by-Step Verification Record

2.1 Source Verification

1. Do you judge there is a conflict of interest for the publisher of this promotional content?

☐ Yes ; ☐ No ; ☐ Cannot determine

2. Has the publisher disclosed their financial interests in the promoted project?

☐ Yes ; ☐ No ; ☐ Cannot determine

3. Key findings of this verification and changes in your judgment:

2.2 Context Verification

1. Does this promotional content lack key background such as "pre-promotion holdings / transactions"?

☐ Yes ; ☐ No ; ☐ Cannot determine

2. After supplementing the missing background information, would it change your judgment of "genuine recommendation"?

☐ Yes ; ☐ No ; ☐ Cannot determine

3. Key findings of this verification and changes in your judgment:

2.3 Evidence Verification

1. Is there consistent evidence supporting / refuting that this content involves market manipulation?
☐ Supports ; ☐ Refutes ; ☐ No consistent conclusion
2. Core evidence types supporting the conclusion (multiple selections allowed):
☐ Independent media investigative reports
☐ Blockchain transaction records
☐ Legal litigation documents
☐ Other: _____
3. Key findings of this verification and changes in your judgment:

2.4 Risk Assessment

1. You judge the risk level of this influencer promotional content being disseminated unverified as:
☐ Low ; ☐ Medium ; ☐ High
2. Main risks that may arise from widespread dissemination of this content (multiple selections allowed):
☐ Retail investors suffering financial losses
☐ Exacerbating crypto market speculative volatility
☐ Undermining trust in the influencer economy
☐ Other: _____
3. Key findings of this assessment and changes in your judgment:

III. Final Dissemination Decision

1. After completing all verification, what actions will you take? (Multiple selections allowed)
☐ Forward directly ; ☐ Forward with verification notes
☐ Do not forward ; ☐ Decide after further verification

☐ Report to the platform

2. Core reasons for your decision:

IV. Review & Reflection

1. Comparing your initial judgment with your final decision, has there been a change? What caused the change?

2. Which verification stage exerted the greatest impact on your final decision, and why?

3. After completing this case, what information verification capabilities have you mastered? (Multiple selections allowed)

☐ Conflict of interest identification

☐ Promotional context analysis

☐ Transaction evidence verification

☐ Financial risk judgment

☐ Decision-making under uncertainty

4. Other reflections and takeaways:

Case 4: Fake News Verification Record

Basic Information

Participant Name: _____ ; Activity Date: _____

I. Initial Judgment

1. After reading the content scenario of "blogger finds Chinese elementary school student Qin Lang's winter vacation homework in Paris and searches for the owner," would you forward this message?

☐ Yes ; ☐ No ; ☐ Uncertain

2. Your initial reasons for this judgment:

II. Step-by-Step Verification Record

2.1 Source Verification

1. You judge the original publishing source type of this information is:

☐ Official institution ; ☐ Self-media account ; ☐ Authoritative media

2. Can this information be traced to accountable entities such as schools, parents, or police?

☐ Yes ; ☐ No ; ☐ Cannot determine

3. Key findings of this verification and changes in your judgment:

2.2 Context Verification

1. Does this content have characteristics of "entertainment packaging, emotion-driven dissemination"?

☐ Yes ; ☐ No ; ☐ Cannot determine

2. After removing dramatic elements such as "Paris" and "winter vacation homework," would the dissemination power and credibility of the event change?

☐ Yes ; ☐ No ; ☐ Cannot determine

3. Key findings of this verification and changes in your judgment:

2.3 Evidence Verification

1. Is there consistent evidence supporting / refuting the authenticity of this event?
☐ Supports ; ☐ Refutes ; ☐ No consistent conclusion
2. Core evidence types supporting the conclusion (multiple selections allowed):
☐ Police official announcement
☐ Party's apology statement
☐ Platform penalty results
☐ Other: _____
3. Key findings of this verification and changes in your judgment:

2.4 Risk Assessment (corresponding to "Risk Assessment Card")

1. You judge the risk level of this help-seeking false information being disseminated unverified as:
☐ Low ; ☐ Medium ; ☐ High
2. Main risks that may arise from widespread dissemination of this content (multiple selections allowed):
☐ Harming minors with the same name and their families
☐ Depleting public trust in genuine help requests
☐ Encouraging the culture of staged photos and rumors
☐ Other: _____
3. Key findings of this assessment and changes in your judgment:

III. Final Dissemination Decision

1. After completing all verification, what actions will you take? (Multiple selections allowed)

- ☐ Forward directly ; ☐ Forward with verification notes
- ☐ Do not forward ; ☐ Decide after further verification
- ☐ Report to the platform

2. Core reasons for your decision:

IV. Review & Reflection

1. Comparing your initial judgment with your final decision, has there been a change? What caused the change?
2. Which verification stage exerted the greatest impact on your final decision, and why?
3. After completing this case, what information verification capabilities have you mastered? (Multiple selections allowed)
 - ☐ Staged photo trace identification
 - ☐ Publisher narrative scrutiny
 - ☐ Official information cross-verification
 - ☐ Well-intentioned dissemination risk judgment
 - ☐ Correcting dissemination behavior
4. Other reflections and takeaways:

Case 5: AI Deepfake News Verification Record

Basic Information

Participant Name: _____ ; Activity Date: _____

I. Initial Judgment

1. After watching the AI-fabricated news video scenario of "military coup in Paris, Macron steps down," would you forward this message?

☐ Yes ; ☐ No ; ☐ Uncertain

2. Your initial reasons for this judgment:

II. Step-by-Step Verification Record

2.1 Source Verification

1. Is the original creator identity of this news video traceable?

☐ Yes ; ☐ No ; ☐ Cannot determine

2. Is this content labeled with source notes such as "AI-generated / fictional"?

☐ Yes ; ☐ No ; ☐ Cannot determine

3. Key findings of this verification and changes in your judgment:

2.2 Context Verification

1. Is this video completely stripped of its original creative context and repackaged as real breaking news for dissemination?

☐ Yes ; ☐ No ; ☐ Cannot determine

2. After supplementing the original context of this AI-generated work, will it change your qualitative judgment of the information?

☐ Yes ; ☐ No ; ☐ Cannot determine

3. Key findings of this verification and changes in your judgment:

2.3 Evidence Verification

1. Is there consistent evidence supporting / refuting the authenticity of this coup event?
☐ Supports ; ☐ Refutes ; ☐ No consistent conclusion
2. Core evidence types supporting the conclusion (multiple selections allowed):
☐ French official media debunking
☐ Independent fact-checking conclusions
☐ Technical-level tampering evidence
☐ Other: _____
3. Key findings of this verification and changes in your judgment:

2.4 Risk Assessment

1. You judge the risk level of this cross-border political false news being disseminated unverified as:
☐ Low ; ☐ Medium ; ☐ High
2. Main risks that may arise from widespread dissemination of this content (multiple selections allowed):
☐ Triggering cross-border public panic
☐ Misleading international public opinion perception
☐ Exacerbating regional instability expectations
☐ Other: _____
3. Key findings of this assessment and changes in your judgment:

III. Final Dissemination Decision

1. After completing all verification, what actions will you take? (Multiple selections allowed)
☐ Forward directly ; ☐ Forward with verification notes
☐ Do not forward ; ☐ Decide after further verification

☐ Report to the platform

2. Core reasons for your decision:

IV. Review & Reflection

1. Comparing your initial judgment with your final decision, has there been a change? What caused the change?

2. Which verification stage exerted the greatest impact on your final decision, and why?

3. After completing this case, what information verification capabilities have you mastered? (Multiple selections allowed)

☐ Cross-border information source assessment

☐ AI-fabricated content identification

☐ Multi-source evidence cross-verification

☐ Geopolitical risk judgment

☐ Decision-making under uncertainty

4. Other reflections and takeaways:
